Michigan Technological University

Houghton, MI • (906) 487-1885

Michigan Tech was founded in 1885 in response to the first mining boom in the US — the clamor for Michigan’s copper, which preceded the California Gold Rush by several years. At its outset, the college trained mining and metallurgical engineers. Today, the University offers certificates, associate, bachelors, masters, and doctoral degrees in arts, humanities, and social sciences; business and economics; computing; engineering, forestry and environmental science, sciences; and technology. Michigan Tech undergraduates benefit from an education that emphasizes study across disciplines, team learning, and research. Our graduate students receive intensive, advanced instruction and the opportunity to pursue research in a wide range of academic programs. Overall, our institution has gained worldwide attention for innovative education; our faculty members strive to be mentors; our academic programs stress learning hand in hand with application; and our students learn to inquire and discover knowledge.

02/15/2008
Situated on the scenic Keweenaw Peninsula, Michigan Tech students can enjoy on-campus trails for biking, jogging, and, during the winter months, nordic skiing under the lights. The biggest annual event is the Winter Carnival with massive snow statues and a lot more, and students can join one of more than 150 student groups. The Rozsa Center for the Performing Arts hosts cultural events, and the Husky athletics include NCAA Division I men’s ice hockey, Division II men’s and women’s basketball, tennis, track and field, nordic skiing, cross country, and women’s volleyball.

In addition to great classroom and laboratory experiences, Tech students can join an Enterprise team where they solve real problems for industry sponsors. The Pavlis Institute for Leadership trains students here and abroad to lead change, and the Senior Design capstone program fosters research, development, and communication skills. We have more Peace Corps master’s programs than any other university, and our entire Graduate School continues to grow, especially the PhD programs.

Michigan Tech takes every precaution to insure a safe and positive learning environment. The University was recently ranked by Reader’s Digest as the third safest campus in the nation. We have a robust emergency plan to continually educate the campus community, disseminate information as accurately and timely as possible. Residence hall students receive a Guide to Emergency Procedures, and the campus community is encourages to review safety information on the “Safety First” website. Also, our Public Safety Department works closely with local law enforcement agencies on a continual basis.

Student Experiences and Perceptions

Students who are actively involved in their own learning and development are more likely to be successful in college. Colleges and universities offer students a wide variety of opportunities both inside and outside the classroom to become engaged with new ideas, people, and experiences. Institutions measure the effectiveness of these opportunities in a variety of ways to better understand what types of activities and programs students find the most helpful.

CLICK HERE for examples of how Michigan Tech evaluates the experiences of its students.

In addition, institutions participating in the VSA program measure student involvement on campus using one of four national surveys. Results from the one survey are reported for a common set of questions selected as part of VSA. Following are the selected results from the National Survey of Student Engagement (NSSE). The questions have been grouped together in categories that are known to contribute to student learning and development. The results reported below are based on the responses of seniors who participated in the survey.

CLICK HERE for information on the NSSE survey.

Active Learning Experiences

| 87% of seniors spent at least 6 hours per week preparing for class. | Student Interaction with Campus Faculty and Staff |
| 24% of seniors worked on a research project with a faculty member. | 55% of seniors believed that the campus staff were helpful, considerate, or flexible. |
| 62% of seniors participated in an internship, practicum, or field experience. | 76% of seniors believed that faculty are available, helpful, or sympathetic. |
| 62% of seniors participated in community service or volunteer work. | 95% of seniors reported that faculty members provided prompt feedback on their academic performance. |
| 12% of seniors participated in study abroad. | 68% of seniors discussed readings or ideas with faculty members outside of class. |
| 94% of seniors made at least one class presentation last year. | |

Institutional Commitment to Student Learning and Success

| 96% of seniors believe this institution provides support for student success. | Experiences with Diverse Groups of People and Ideas |
| 72% of seniors rated the quality of academic advising at this institution as good or excellent. | 52% of seniors reported that they often tried to understand someone else’s point of view. |
| 58% of seniors reported that this institution provided help in coping with work, family and other non-academic responsibilities. | 76% of seniors reported their experience at this institution contributed to their understanding people of other racial and ethnic backgrounds. |
| 91% of seniors reported working harder than they thought they could to meet an instructor's standards or expectations. | 39% of seniors often had serious conversations with students of a different race or ethnicity. |
**Student Learning Outcomes**

All colleges and universities use multiple approaches to measure student learning. Many of these are specific to particular disciplines, many are coordinated with accrediting agencies, and many are based on outcomes after students have graduated. In addition, those institutions participating in the VSA measure increases in critical thinking, analytic reasoning, and written communication using one of three tests.
